JULY, 1905

By the Wholesale Plate Glass Manufacturers' Association.

AND OUR

COMPLETE LINE OF SPECIALTIES.

Roach & Musser Sash and Door Co.
MAKERS OF EVERYTHING IN MILLWORK
MUSCATINE, IOWA.

WE take pleasure in presenting the trade with this, our complete 1905 catalogue, and trust that it may often be found of service. The designs shown are, without exception, original with us and in strict conformity with modern styles of architecture, and while in great variety cover only a small portion of the many designs we manufacture.

We have an immense plant equipped with the very latest and most complete labor-saving machinery, and are prepared to furnish promptly

EVERYTHING IN

MILLWORK

**IN ANY QUANTITY
AND OF ANY WOOD**

Regardless of design or competition, and take pleasure at all times in submitting estimates, either direct from plans or itemized memorandums, and solicit the opportunity of serving you when in the market.

Yours very truly,

Roach & Musser Sash & Door Co.

OFFICIAL GRADES OF SASH, DOORS, AND BLINDS.

*Adopted by the Wholesale Sash, Door & Blind Manufacturers' Association
of the Northwest, October 15, 1903.*

DOORS.

A Standard Door may be through tenon, blind tenon, or dowelled.

AAA Oil Finish Doors.—Material for AAA Doors must be Clear, no white sap admitted. Workmanship must be good.

AA Oil Finish Doors.—Material for AA Oil Finished Doors must be Clear, with the exception that white sap will be admitted, not to exceed twenty-five (25) per cent of the face of one piece. Workmanship must be good.

A Doors.—Material in A Doors must be Clear, with the exception that water stains and small pin knots not exceeding one-fourth ($\frac{1}{4}$) inch in diameter may be admitted. No piece to contain more than one (1) such defect and no door more than three (3) such defects on each side; white sap not considered a defect. Workmanship must be good.

B Doors.—Material in B Doors may contain knots not to exceed one (1) inch in diameter, blue sap or brown stain not to exceed twenty-five (25) per cent on either side of any one piece of the door, gum spots showing on one side (1) of a piece only, and other slight defects. The total defects shall not exceed eight (8) in number on each side, and each stile, bottom, and lock rail must contain at least one (1) and not to exceed two (2) such defects; plugs admitted and not considered as a defect. Slight defects in workmanship admitted.

C Doors.—Material in C Doors may contain all stained sap and small worm holes and fine shake; also knots not exceeding one and one-half ($1\frac{1}{2}$) inches in diameter. Fifteen defects may be allowed on each side, also slight defects in workmanship. Each piece in a C Door must contain a defect; not more than four (4) defects allowed in any one piece.

D Doors.—D Doors are regarded as a Cull Door and must contain large, coarse knots, and may contain rot, worm holes, shake, and other serious defects.

WINDOWS.

Check Rail Windows and Sash may contain two (2) knots three-eighths ($\frac{3}{8}$) inch in diameter or one red knot five-eighths ($\frac{5}{8}$) inch in diameter in each piece of a window. White sap and not over thirty-three and one-third ($33\frac{1}{3}$) per cent blue sap may be admitted in any one window. Workmanship must be good.

Plain Rail Windows and Sash may contain blue sap and small knots.

BLINDS.

No. 1 Outside Blinds must be of Clear lumber, except that small, sound pin knots, water, stain, and white sap may be admitted. Workmanship must be good.

WOODS ADMISSIBLE.

Woods other than **Michigan, Wisconsin, and Minnesota white pine** admitted in Doors, Blinds, and Windows.

Roach & Musser Sash and Door Co.
MAKERS OF EVERYTHING IN MILLWORK
MUSCATINE, IOWA.

Remember When Ordering

That all manufacturers and jobbers have their own special design numbers and **that it is necessary**, when ordering special designs by number selected from some other catalogue, that you mention in whose catalogue the designs and numbers selected are shown, **otherwise** should a design of similar description bearing same number appear in this catalogue, we will understand it was from this book you made your selection and will get out the work accordingly.

Work once cut and in process of manufacture can not be changed or cancelled except at expense of purchaser.

When referring to orders always give the number or date of your order and our order number; it insures immediate reply.

If goods fail to arrive within a reasonable time, notify us and we will have tracer started.

On the arrival of goods, check them over carefully with invoice and if any shortages or errors, advise us promptly.

Always read your order over carefully before sending it in. Every day we are compelled to hold orders until we can write our customers, often to their great inconvenience, owing to their having neglected to specify such important points as size and thickness.

Read carefully, opposite page, "Directions for Ordering."

Roach & Musser Sash and Door Co.
MAKERS OF EVERYTHING IN MILLWORK
MUSCATINE, IOWA.

DIRECTIONS FOR ORDERING.

NOTE CAREFULLY.—A WINDOW indicates two pieces. A SASH indicates one piece.
A PAIR OF BLINDS indicates two pieces. A BLIND indicates one piece.
A SET OF SASH or BLINDS indicates more than two pieces,
and order should be accompanied with sketch.

Much valuable time can be saved in closely following these instructions :

Be explicit — **do not assume that we know what is wanted.**

Always give width first in specifying sizes ; *this applies to everything in millwork.*

Orders for Sash should state number of lights in window, size of glass, thickness, whether plain or check rail, glazed or open. If glazed, state single or double strength glass ; if not stated, we will glaze single strength. For segment top windows, always give the radius of the segment, otherwise we will make the regular radius, which is the width of the opening. For circle head and segment head windows, always state whether they are wanted to finish circle inside and outside, like designs 197 and 199 on pages 54 and 55, or to finish circle on outside only, like designs 200 and 201 on same pages ; also, where frames are made, we should have width and height inside of the frame in the clear. If no measurements are given, we will always make windows to correspond with size of windows as given in this list.

In every case where our regular sizes and styles are not used, please specify the openings to fill, in addition to giving number of lights, glass size, and furnish complete description.

Orders for Doors should state size, thickness, number of panels, and quality ; if moulded, say if one or more sides ; flush or raised moulding. To patterns in this or other catalogues, refer by number. **If design is taken from any other catalogue, state from whose book it is taken, and the date of issue.**

Orders for Outside Blinds should state number of lights in window, size of glass, thickness of blinds, stationary or rolling slats ; if for segment head windows, give radius.

Doors, Blinds, and Sash are often ordered $1\frac{1}{4}$, $1\frac{1}{2}$, and 2 inches thick. **Do not use these terms, as it only delays orders.** The regular thicknesses are $1\frac{1}{8}$, $1\frac{3}{8}$, and $1\frac{3}{4}$ inches. We can make them $1\frac{1}{4}$, $1\frac{1}{2}$, and 2 inches, at extra price.

Orders for Inside Blinds should state *exact size* of opening (outside measure) and thickness, the number of folds, and if panels or slats, and where blinds are to be cut. If of patterns shown on page 154, refer by number, or make sketch if special.

Orders for Outside Door Frames should state whether for a frame or brick building, also width and thickness of jambs, and whether made with rabbet or stop.

Orders for Window Frames, other than box frames, should state if for plain or check rail sash, with or without pulleys, giving width of jambs. For inside door jambs, give the width and thickness of the jamb, and whether with rabbet or stop. Window frames and inside door jambs are always furnished *without stops*, unless otherwise ordered.

Orders for Mouldings should give plainly the number of the moulding. If special moulding, give exact detail or sketch.

Refer by number in catalogues, or send sketches, as far as possible, of anything other than shown in this or other books.

For open 3-light Cellar Sash made $1\frac{3}{8}$ inches thick, add 15 per cent to $1\frac{1}{8}$ open list. Note C.

For glazed 3-light Cellar Sash made $1\frac{3}{8}$ inches thick, add 20 per cent of the $1\frac{1}{8}$ open list to $1\frac{1}{8}$ glazed list. Note C.

We highly recommend Wire Glass as a glazing for Cellar Windows; gives perfect light and is much stronger and better adapted for Cellar and Basement Sash than ordinary window glass.

For prices of Wire Glass see page 354.

For 1¾-inch Open Transoms, add to the 1½-inch Open list 50 per cent.

For 1¾-inch Glazed Transoms, add 66⅔ per cent of the 1½-inch Open list to Glazed list.

For Sash Extras, see pages 64 and 65.

COLONIAL TRANSOMS.

33

For open $1\frac{3}{8}$ inches thick, add \$1.10 to list price of One-light Transom of same size. For glazed, add \$1.45 to Glazed list.

34

For open $1\frac{3}{8}$ inches thick, add 12 cents list for each marginal light to price of One-light Open Transom of same size. If glazed with plain glass add 17 cents list for each light to price of One-light Transom of same size, glazed with plain glass.

35

For open $1\frac{3}{8}$ inches thick, add 24 cents list for each light to price of One-light Open Transom of same size. If glazed with plain glass add 36 cents list for each light to price of One-light Transom, same size, glazed with plain glass.

36

For open $1\frac{3}{8}$ inches thick, add \$6.00 to list price of $1\frac{3}{8}$ -inch One-light Transom of same size. For glazed, add \$8.05 to Glazed list.

37

For open $1\frac{3}{8}$ inches thick, add 24 cents list for each light to price of a One-light Open Transom of same size. If glazed with plain glass add 36 cents list for each light to price of a One-light Transom of same size, glazed with plain glass.

38

For open $1\frac{3}{8}$ inches thick, add 24 cents list for each light to price of One-light Open Transom of same size. If glazed with plain glass add 36 cents list for each light to price of a One-light Transom of same size, glazed with plain glass.

If above Transoms are glazed with white chipped or colored glass (any color except ruby), add 40 cents per square foot of glass measure to glazed list. If ruby, add 70 cents per square foot.

TRANSOMS.

46

Segment In and Out.

45

Segment Out, Square In.

47

Circle In and Out.

For prices of above Transoms add to the List Price of a One-Light, Square-top Transom of same outside measure as listed on pages 36 and 37, as follows:

- No. 45. For 1 3/4-inch thick and not over 3 feet 4 inches wide. If open, \$0.85; if glazed, \$1.15.
 No. 46. If open, \$0.85; if glazed, \$1.15.
 No. 45. For 1 3/4-inch thick and not over 3 feet 4 inches wide. If open, \$1.30; if glazed, \$1.75.
 No. 46. If open, \$1.30; if glazed, \$1.75.
 No. 45. For 1 3/4-inch thick and over 3 feet 4 inches wide. If open, \$1.45; if glazed, \$1.95.
 No. 46. If open, \$1.45; if glazed, \$1.95.
 No. 45. For 1 3/4-inch thick and over 3 feet 4 inches wide. If open, \$2.15; if glazed, \$2.90.
 No. 46. If open, \$2.15; if glazed, \$2.90.
 No. 47. If open, \$0.85; if glazed, \$1.15.
 No. 47. If open, \$1.75; if glazed, \$2.35.
 No. 47. If open, \$1.30; if glazed, \$1.75.
 No. 47. If open, \$2.60; if glazed, \$3.50.
 No. 47. If open, \$1.45; if glazed, \$1.95.
 No. 47. If open, \$2.85; if glazed, \$3.80.
 No. 47. If open, \$2.15; if glazed, \$2.90.
 No. 47. If open, \$4.30; if glazed, \$5.75.

48

1/2 Circle.

49

Extended 1/2 Circle.

50

1/4 Circle.

For prices of above Transoms add to the List Price of a One-light, Square-top Transom of same outside measure as listed on pages 36 and 37, as follows:

- No. 48. For 1 3/4-inch thick and not over 3 feet 4 inches wide. If open, \$3.00; if glazed, \$4.00.
 No. 49. If open, \$5.65; if glazed, \$7.50.
 No. 48. For 1 3/4-inch thick and not over 3 feet 4 inches wide. If open, \$4.50; if glazed, \$6.00.
 No. 49. If open, \$8.40; if glazed, \$11.25.
 No. 48. For 1 3/4-inch thick and over 3 feet 4 inches wide. If open, \$4.30; if glazed, \$5.75.
 No. 49. If open, \$8.75; if glazed, \$11.00.
 No. 48. For 1 3/4-inch thick and over 3 feet 4 inches wide. If open, \$6.50; if glazed, \$8.65.
 No. 49. If open, \$12.50; if glazed, \$16.70.
 No. 50. If open, \$5.00; if glazed, \$6.95.
 No. 50. If open, \$4.50; if glazed, \$6.00.
 No. 50. If open, \$6.70; if glazed, \$9.25.
 No. 50. If open, \$7.20; if glazed, \$9.60.
 No. 50. If open, \$10.10; if glazed, \$13.70.

51

Gothic.

52

Gothic.

53

Gothic.

For prices of above Transoms add to half the List Price of a Two-light, Square-top Window of same size glass as listed on pages 8 to 12, as follows:

- No. 51. For 1 3/4-inch thick and not over 3 feet 4 inches wide. If open, \$1.75; if glazed, \$2.35.
 No. 52. If open, \$3.50; if glazed, \$4.70.
 No. 51. For 1 3/4-inch thick and not over 3 feet 4 inches wide. If open, \$2.60; if glazed, \$3.50.
 No. 52. If open, \$5.25; if glazed, \$7.00.
 No. 51. For 1 3/4-inch thick and over 3 feet 4 inches wide. If open, \$2.85; if glazed, \$3.80.
 No. 52. If open, \$5.75; if glazed, \$7.70.
 No. 51. For 1 3/4-inch thick and over 3 feet 4 inches wide. If open, \$4.30; if glazed, \$5.75.
 No. 52. If open, \$8.60; if glazed, \$11.50.
 No. 53. If open, \$5.75; if glazed, \$7.85.
 No. 53. If open, \$6.60; if glazed, \$9.00.
 No. 53. If open, \$6.85; if glazed, \$9.20.
 No. 53. If open, \$8.30; if glazed, \$11.25.

COLONIAL WINDOWS.

STORM SASH.

Usually made 1 1-8-inch thick with 2 1-4 or 3-inch stiles and top rail and 5-inch bottom rail.

2-Light Storm Sash
with Slide Ventilator.

4-Light Storm Sash
without Ventilator.

3-Light Storm Sash
for Cottage Front Windows
with Double-Slide Ventilator.

8-Light Storm Sash
with Swing-Light Ventilator.

12-Light Storm Sash
without Ventilator.

LIST PRICE.

When made 1 1/8 inches thick with 2 1/4-inch stiles and top rail and 5-inch bottom rail, take same list price as 1 3/8-inch Check Rail Windows of same size opening and number of lights.

For 1 3/8-inch Open Storm Sash add 15 per cent to Open List of 1 3/8-inch Check Rail Window.

For 1 3/8-inch Glazed Storm Sash add 20 per cent of 1 3/8-inch Open Check Rail Window List to Glazed List.

For O G on outer edge, 3-inch stiles and top rail, add, if 10 or more, 12c net, less than 10, 15c net.

For Slide Ventilator, either in top or bottom rail, add, if 10 or more, 10c net, less than 10, 12c net.

For Swing-Light Ventilator, add, if 10 or more, 40c net, less than 10, 50c net.

STORM SASH AND FULL SIZE WINDOW SCREEN HANGERS AND FASTENER.

Cut showing our Hanger, style "A," as applied to the outside head casing of window frame and upper end of storm sash stiles.

Hanger, Style "A,"
Visible.

Hanger, Style "B,"
Invisible.

STEEL—Japanned.

Cut showing our Hanger, style "B," as applied to the inside upper corners of window frame and outside upper corners of storm sash.

In fitting, sash should be wedged up off the sill close up to head casing of frame so that when hung it will be free of sill and air tight at top.

FASTENER.

1

Illustrations showing how fasteners are applied to storm sash and window frame. When closed, as shown in sketch No. 1, the fastener hangs parallel with blind stop to which button is attached and pin driven, the pin projecting through the lower end of the slot holds fastener in position when locked. To open the sash the lower end of the fastener is pulled outward to release from pin. The sash is then pushed out to open position, as shown in sketch No. 2. In opening the sash the fastener turns upon the pivot sliding on the button, the head of which is larger than the slot to prevent the fastener coming loose. The sash is pushed out until the button reaches the upturned end of the slot, allowing the fastener to drop to carry the button into the upturned end. This holds the fastener in position and also holds the sash rigid and strong. To close the sash the finger end of the fastener is lifted sufficiently to bring the button down to the body of the slot, when the sash will slide to closed position by its own weight. When closed, turn the fastener down, as shown in sketch No. 1, which locks the sash absolutely air tight. An enlargement is formed in the slot, through which the head of button is passed to allow detachment of fastener.

2

Ours is by far the best, most easily applied, and gives greater satisfaction than any other style Hanger and Fastener on the market. Storm Sash when equipped with the "Schroeder" Hanger and Fastener can be put up and taken down from inside of house, are easily opened for ventilation, washing of windows, and escaping of dust when sweeping. The fastener draws and locks the sash absolutely air tight, and when open can not rattle or blow off.

TABOR PATENT SASH STRIP AND FIXTURE

FOR

**Sliding, Revolving, Removable, and
Vertically Pivoted Sash.**

Sketch "A,"
Sliding and Revolving Sash.

Sash Stile.

Patent Fixture.

Patent Strip.

Sketch "B,"
Revolving Sash.

Specially adapted for large windows and transoms in factories, offices and public buildings, schools, colleges, etc.

Can be placed in any style window or sash frame, and when used in connection with regular windows both sash can be raised, lowered or revolved like shown in sketch "A."

The Hanging Strips, by the use of the patent fixture or pivot, are fastened to the sides of sash and rest between stops of window frame; are one inch wide and of same wood, length, and thickness as sash to which they are attached.

The patent fixture has automatic locking attachment, which holds the sash perfectly rigid at any angle desired. The flat or pivot end of fixture is screwed to face of hanging strips, and the spring and pivot lock are placed in sash stile in the same manner as pulleys are fastened in frame; is absolutely air proof, water proof, and indestructible.

Prices of Sash, Fixtures and Strips complete, quoted on application.

5626

SASH EXTRAS.

NOTE—(a). The term “stock quantities,” wherever used in this list, means 5 or more Doors, and 10 or more Windows, Sash, or Blinds, of one size, kind, and quality.

NOTE—(b). Irregular and intermediate sizes, in stock quantities, same list as next larger listed size, both open and glazed. For less than stock quantities on sizes not listed, an extra 10 per cent will be charged.

NOTE—(c). Where no provision is made for price on quantities less than 10, use stock quantity price and add 10 per cent to the amount thus created.

Roach & Musser Sash and Door Co.
MAKERS OF EVERYTHING IN MILLWORK
MUSCATINE, IOWA.

Painted and Grained Doors

In all large Sash and Door Factories there accumulates considerable knotty lumber, trimmings from factory plank which is not permitted in regular grades of Sash, Doors, and Blinds. How to dispose of this lumber to advantage was a serious question for many years, and until Painted Doors were originated, all was sawed up and sent to the wood pile, but Painted Doors were looked upon as a partial cure for this waste, and the better grades of this lumber were diverted to their manufacture, establishing a grade of doors known as No. 4's Painted, and this grade was maintained as long as the demand continued moderate, but this was only for a short time, as the trade in them soon became enormous, waste lumber was quickly exhausted, and other lumber much poorer in grade entered into their manufacture, until to-day Painted and Grained Doors from most factories could be correctly classed anywhere from a No. 5 to a No. 7 door, so poor is the quality of the material used.

**All our Painted Doors are made
from strictly No. 4 Quality Stock**

*and retain every feature of
the Original Painted Door.*

We use only pure paints, hand coating each door twice, and dry in a room specially adapted to the purpose, free from all dust and dirt, assuring a smooth, perfect finish; one that will not chalk, crack, or blister.

**Our Grained Doors are made in the
same careful manner from No. 4 Stock**

The most perfect Painted and Grained Doors on the market.

Yours very truly,

Roach & Musser Sash & Door Co.,
MUSCATINE, IOWA.

FRONT DOORS.

*Little did the originator imagine the magnitude his idea
would assume.*

It is hardly possible for one to realize what an important item this has become in the Sash and Door business. It is comparatively but a short time since the first low-priced Fancy Front Doors were introduced, and they comprised but two patterns, the Hershey and Musser, later known as Nos. 305 and 307.

These doors became immediately popular and other patterns quickly followed, which were augmented as rapidly as new designs could be devised, until to-day, over 2,000 different patterns of Fancy Front Doors are being manufactured and sold at a less price than a No. 210 OG Sash Door.

For a dealer to handle this enormous number is of course out of the question. It therefore behooves the judicious retailer to handle only such patterns as combine all the requirements of successful selling.

To the Front Door question we have given considerable study, have consulted the leading architects of the country and gleaned from them the ideas and desires of the house owners and builders of to-day, and believe we have brought forth a line of Front Doors that possess easier and quicker selling qualities than any other Front Doors on the market, and at lower prices than doors of equal qualities have been heretofore sold at.

The illustrations on the following pages serve only in giving a slight idea of what our doors are; a sample order will clearly convince of their superior qualities.

For Price of 308, either Open or Glazed, add to Price of No. 300	2.50
For Price of 310, either Open or Glazed, add to Price of No. 300	3.50

Above prices subject to door discount.

We make Side Lights to match any style door, in any wood, solid or veneered, at lowest prices.

DOOR EXTRAS.

NOTE—(a) The term “stock quantities,” wherever used in this list, means 5 or more Doors and 10 or more Windows, Sash, or Blinds of one size, kind, and quality.

NOTE—(b) Irregular and intermediate sizes, in stock quantities, same list as next larger listed size. For less than stock quantities, on sizes not listed, an extra 10 per cent will be charged.

NOTE—(c) Where no provision is made for price on quantities less than 5, use stock quantity price and add 10 per cent to the amount thus created.

No.	Width.	For 5 or	For less
		more	than 5
1.	For Doors over 3 feet in width up to 3 feet 6 inches, add to list of 3-foot Door, same height.....	20%	Note C

veneered doors.

THE great care and attention which we give to every detail in the manufacture of our Veneered Doors insure perfect production unequalled anywhere.

Veneered Doors, while an old article, can be considered a comparatively new one, owing to the art of veneering having been but recently fully understood and perfected. For several years after their introduction, the work was nearly all done by hand, which necessitated their selling at very high prices, and in consequence were but little used. While to-day, through the use of improved machinery especially adapted to their manufacture, they are being sold at a price only slightly in advance of that of a common Pine Door, and are being used in all modern homes and public buildings throughout the country.

Veneered Doors, if well made, should not warp, crack, or blister. These defects arise from the use of lumber not perfectly kiln dried, core or filling not properly put together, and the use of a cheap grade of glue. These difficulties frequently confronted us during our first year of veneered door making, yet served to aid us in correcting and perfecting our product, for each door in which any defect occurred was completely overhauled and experimented upon, until the trouble was located and permanently overcome and a perfect door assured.

In all our Veneered Doors we use $\frac{3}{16}$ -inch veneer, carefully matched in grain and color, cores of built up white pine, *all thoroughly kiln dried*, and the best glue made, superior workmanship, and a thorough inspection before shipping.

We constantly have on hand a large stock of veneer in all woods, and can make up promptly any style of door wanted, either from illustrations, or special details, and solicit your orders for this class of work.

Yours very truly,

Roach & Musser Sash & Door Co.

WINDOW AND SASH SCREENS.

Full Size Window Screen.

Made to match any style window, Square or Bent, Segment, Circle, or Gothic top, of any wood with any wire.

DIRECTIONS FOR ORDERING.

Always give exact size of opening (width and height) screens are to fill, and size of glass in window they are to cover, and whether for half or full size of window opening, thickness, kind of wood wanted, kind of wire wanted, and if frames are to be painted, stained, or finished in oil natural.

Unless otherwise ordered

we make screens $\frac{7}{8}$ in. thick, paint black, and cover with black wire cloth.

Half Size Window Screen.

Used only to cover lower half of window, grooved on both sides to slide, easily and quickly removed, furnished complete with slides as shown.

Transom Screen.

Made to match any style transom, Square, Segment, Circle, or Gothic top.

Cellar Window Screens.

For cellar window screens, we recommend galvanized wire.

Window and Sash Screens We Make to Order Only.

Of any wood, either painted, stained, or finished in oil natural, $\frac{7}{8}$ or $1\frac{1}{8}$ inches thick, with any wire, green, black, pearl, coppered or galvanized, and any shape, bow or bent, triangular, oval, diamond, segment, circle, gothic, or peak head.

For prices see our "Screen Goods Booklet."

SCREEN HARDWARE.

For Window Screens and Screen Doors.

Wire Screen Lift.

For half size window screens.

Furnished in bright wire or polished brass, very neat and strong, sets on upper edge of bottom rail.

Brass Numbers.

Furnished in duplicate from 1 to 50, in one size only, 1/2-inch diameter.

By driving one in the screen and one in the window frame you know exactly in just which window every screen belongs.

Self-Acting Hold Back Spring Hinge.

Porcelain Knob.

Wire Hook and Eye.

One set complete, consisting of two spring hinges, one knob, and one wire hook and eye (enough for one screen door), packed in neat pasteboard box.

For prices see our "Screen Goods Booklet."

MAKERS OF EVERYTHING IN MILLWORK
MUSCATINE, IOWA.

INSIDE SLIDING BLINDS.

For old or new houses, in every variety of wood, style, and finish.

Sliding Blinds set between the jambs of window frame, and slide up and down in grooves or guideways the same as sash.

Sliding Blinds are made two, three, four, or six sections high, and two, three, four, or six divisions wide, according to height and width of window.

The different sections as shown in above illustration operate independently of and are in no way connected with each other. Any section—top, center, or bottom—can be raised or lowered without disturbing the other sections.

Each section is equipped, along one side, with two or more adjustable springs, as shown on page 156, which bear against the groove in guideway and hold the section in any desired position.

The number of divisions to each section vary according to the width of window frame, and are made either all panels, half panels and half slats, or all slats. Slats are made all rolling or stationary, as desired, and when ordered finished complete, ready to put up, are equipped with our concealed slat operator, doing away with the unsightly wood rod.

The guide or runway in which the blinds slide consist of two grooved side pieces, as shown on page 156. These are fastened to jambs of window frame, and like shown in sketches A and B, page 156, serve the double purpose of window stop and guideways.

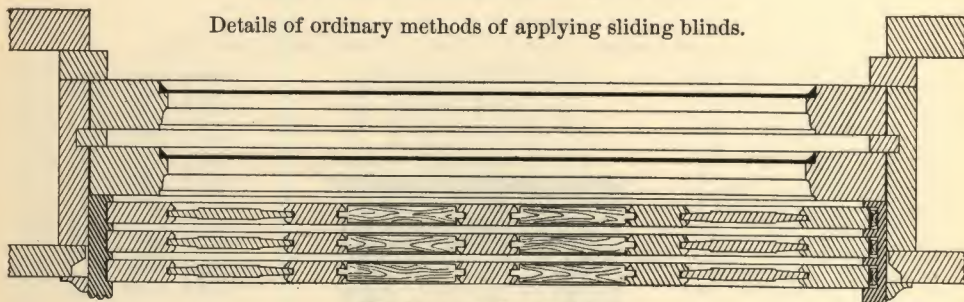

Our sliding blinds can be placed in any window frame, old or new, with equal facility. They embrace all the latest improvements, are a handsome piece of cabinet work, and add greatly to the appearance of any building. They will not sag, bind, rattle, or get out of order; are easily and quickly removed for cleaning, and do not interfere with curtains or draperies.

For list of woods, finishes, and prices see page 157.

MAKERS OF EVERYTHING IN MILLWORK
MUSCATINE, IOWA.

"IMPERIAL" VENETIAN BLINDS.

*The neatest, most serviceable and
satisfactory Inside Blind made.*

Cut showing appearance of Blinds when hung with windows draped.

Our Imperial Venetian Blinds embrace every improvement essential to their ease of adjustment, operation, and durability, and can be fitted to any window frame; they do not interfere with curtains or draperies and effectually exclude sun, yet admit light and air.

For kinds of wood, finish, and prices, see page 160.

We also make Outside Venetian Blinds for porches and awnings, and will be pleased to forward complete Venetian Blind catalogue free upon request.

MAKERS OF EVERYTHING IN MILLWORK
MUSCATINE, IOWA.

"IMPERIAL" VENETIAN BLINDS.

**Simple,
Durable,
Economical.**

**Never
get
out of order.**

**The Complete
Imperial Venetian Blind.**

"Imperial" Venetian Blinds are made of wood slats 2 and 2½ inches wide, ½ inch thick, hung on best quality woven ladder tape, are fastened to head jamb of window frame between stops or side jambs, and raised or lowered, "slats open or closed," by drawing or loosening the cords, as shown in above illustration.

They are made to order only in all the plain and fancy woods, finished natural, stained, painted, or enameled any color or tint desired with ladder tapes and cord to match. They are perfectly noiseless both in use and operation, never rattle, sag, bind, or get out of order, and are suitable for residences, hotels, hospitals, offices, department buildings, court houses, schools, and colleges.

Their simple construction, ease of operation, durability, and moderate price make them the most desirable of any style window blind or shade.

For kinds of wood, finish, and prices, see page 160.

Dental Strip, $\frac{5}{8}$ x $2\frac{1}{4}$ inches. Crown Mould, No. 8009.

Bed Mould, No. 8036. Cove Mould, No. 8060.

Before asking price or ordering complete Porches, read carefully "Directions for
Ordering" on page 193.

DIRECTIONS FOR ORDERING COMPLETE PORCHES.

WE show below ground plan and section of porch, and when asking price or ordering *complete porches* a ground plan and section similarly drawn giving measurements as requested and indicated by dotted lines, must positively be furnished.

In making your drawings it is not necessary to draw to scale, just a rough pencil sketch showing location of columns, newels, steps, and line of building with measurements is sufficient.

GIVE FOLLOWING MEASUREMENTS:

- From "A" face of building to "B" outside of rough framing.
- " " "C" outside of rough framing to "D" outside of rough framing.
- " " "E" face of step stringer to "F" face of step stringer.
- " " "F" face of step stringer to "G" outside of rough framing.
- " No. 1 grade line to No. 2 top of porch floor.
- " No. 2 top of porch floor to No. 3 top of columns.
- " No. 3 top of columns to No. 4 top of cornice.

Width of plancher, width of rafter. Show number of columns wanted, how placed, and width between each.

Our Leading Specialty

FINE STAIR WORK

*Our Stair Department is the
Most Complete in America,
and the work from this branch
of our Institution has long
enjoyed the distinction of being
"the best possible to produce."*

We Work in All Woods

and furnish the Finest Stairways
at Lowest Prices and solicit your
orders for this class of work.

READ

Before Ordering Stair Work.

When ordering stair work, no matter whether a complete stairway or only a part of stairs is wanted,

**IT IS ABSOLUTELY NECESSARY THAT
YOU FURNISH A GROUND PLAN**

even though it is only a rough pencil sketch drawn without regard to scale. It must show the position of all newels, rail, number and position of treads, wall line, and well hole.

***And when ordering a Complete Stairway
mention the following:***

Style of stairway wanted (give design number).
Kind of wood wanted in the different parts.
Height of story from floor to floor.
Width of second story joists including flooring and plaster.
Width of stair from face of plaster to face of finished string.
Radius of all curved work to face of finished string or fascia around well hole.
If platform stairs, state if base for platform is wanted.
Size of newels, balusters, and rail, and width and style of base used in room where stairs are to be erected.

***If Newels, Rail, and Balusters only
are wanted, give:***

Design, quantity, and size of each.
Kind of wood wanted.
Closed or open string.
And if open string, how many balusters to tread.

For different style floor plans see following pages.

STAIRWAYS.

4010

This Stairway including everything complete as shown in design and ground plan, *except* rail and balusters on second floor, skirting and nosing around well hole and rough carriages, height not to exceed 10 feet 6 inches from floor to floor, 3 feet 6 inches wide, in Plain Sawed Oak

\$60.00

In Quarter Sawed Oak

70.00

HARDWOOD FLOORS

Parquetry or Wood Carpet

Parquetry Floors or wood carpet was, until recently, looked upon in this country as designed only for the palatial residence, but through extensive advertising, and the wisdom of many architects, its many advantages and moderate cost are now so well known that nearly all architects specify it, carpenters suggest it, the medical fraternity recommend it, and the women-folks prefer it.

Wood Carpet consists of strips and blocks of hardwood fastened together at edges and on backs, in slabs of convenient size for laying. They are nailed solid to the under floor and finished with wax, or parquetry-lac, to heighten the contrasting colors of the different woods employed, producing a very handsome effect. They are cleaner, more sanitary, last longer, and cost less than carpet of good quality, and, in combination with rugs, make much handsomer floors than can be secured with any other kind of floor covering. They can be laid over old floors as easily and quickly as over new ones.

In our wood carpet we use only the best, thoroughly kiln-dried and most carefully selected hardwoods, and employ only skilled cabinet makers in this department. The work is all carefully examined and measured before shipping, insuring a perfect fit and perfection in every piece, and should there be any combination or arrangement of woods you want, other than those we show on pages following, send us a diagram of your floor and mention about what price you wish to pay and we will submit a colored sketch of exactly what you want, free of charge.

ROACH & MUSSER SASH & DOOR CO.

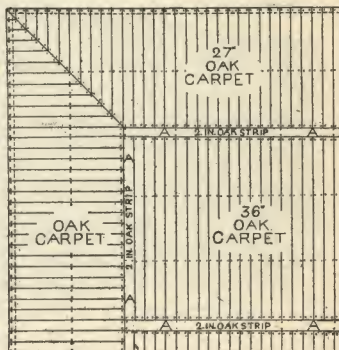

Description of and Directions for Laying and Finishing Wood Carpet or Parquet Flooring.

WOOD CARPET consists of hardwood strips $1\frac{1}{2}$ inches wide, glued to heavy cotton cloth, made 27 and 36 inches wide and in sections containing 4 yards (see illustration on next page); any quantity can be taken by simply slitting the cloth between slats. This part of the carpet we designate as the field or center, and it can be used in connection with strip borders Nos. 5010 to 5022 or with fancy borders Nos. 5030 to 5096, like shown on page 305, or can be arranged in blocks, like shown in center of designs Nos. 5130 to 5147. When made in blocks it is called Parquetry.

Borders are made 10, 12, or 14 feet long, of widths and from woods as given on page 305.

To Lay Wood Carpet, start at the wall, remove the quarter round, then measure out into the room from the wall the width of the first breadth of carpet and tack down the strips marked A, as shown in sketch No. 1, using a $1\frac{1}{4}$ -inch No. 15 wire brad; measure your space thus framed for the center, to make certain it will contain the other breadths, as planned; be sure the corners turned by this strip are square, then lay and brad the carpet in center. Next put down the outside breadths, bringing them up tight to strips A; then brad the entire surface like shown by dots in sketch No. 1. The brads should be driven in rows about 9 inches apart, starting at the top, placing a brad at each edge of slat. If the center is made in blocks like in design 5130 on page 306, you should begin laying exactly in center of room, first finding the border line and tacking down a strip to frame in center or field; then start from center and work out to sides, until the border line is met, when the strip can be taken out and border laid; each piece should be securely nailed and countersunk for scraping and sanding, and should be scraped wherever uneven, then sanded first with the grain and then across the grain, using No. $1\frac{1}{2}$ sandpaper.

Sketch No. 1.

Finishing. The floor should first be swept and dusted, all shavings from scrapings and dust from sanding thoroughly removed; fill all nail holes with good putty, then apply the filler with a brush; remove all surplus filler with waste or excelsior, before it sets or becomes too hard, after which allow twenty-four hours for filler to dry, then apply one coat Parquet-lac; when this is dry apply the wax with a cloth in hand, spreading it out thin in all directions, allowing it time to harden, which will take about an hour. Then take a stiff brush (one of our weighted brushes) and rub the floor across first and with the grain afterwards. Place a piece of dry soft cloth (felt or carpet) under the brush to give the finishing gloss—do not apply too much wax, and it should be well rubbed out in all directions before polishing.

To Take Care of Old Floors. For ordinary wiping use a brush or broom with a piece of cotton flannel pinned over it—an occasional rubbing with the weighted brush will keep a glossy surface on the floor. Soap should never be used, and the parts of the floor which have the most wear should be touched up occasionally with wax to keep it in good condition. Never use oil of any kind on floor; it is sure in time to darken the surface, and the beauty of the floor is in the natural color of the wood.

Carpet floor plan showing arrangement of floor accompanies each shipment.

Description Hardwood Mantels

Illustrated and Priced on Following Pages.

Woodwork—In all our mantels we use the very best of thoroughly kiln dried lumber, carefully selected in both grain and color, insuring a perfect match of the different parts.

The cabinet work is of the very highest order, and the carvings are artistically executed and arranged, imparting a delicate richness to all our mantel creations.

Finish—Oak mantels can be finished natural, antique, golden weathered, and old English or Flemish colors. Golden Oak is very popular, harmonizing with furniture of any finish and *unless ordered otherwise, we will ship in this color.* Birch mantels are finished in natural or to imitate mahogany or cherry, and samples will be mailed free upon request.

Sizes—Our mantels are made five feet wide, "which is standard with all manufacturers." When wanted to cover space over this width we use wall plates attached to each side of the mantel. The wall plate is a flat board, of same wood and finish as mantel, with rounded upper corner, and is neat and attractive in appearance. Tile Hearths are all 5 feet x 21 inches.

Tile—Our tiles are all of the very latest and most artistic colors or shades and harmonize perfectly with the different finishes. The colors mostly in demand and of which we carry a large stock are Ivory, Cream, Green in various tints, Old Rose, Delft Blue, and Mottled Onyz. If no preference is specified we select and ship the color that best harmonizes with the style and finish of the mantel.

Mounting Tile—For mounting face tile in three slabs ready to set we charge from \$2.00 to \$4.00 net according to size of tile opening. When slabbed they can be set in place by any ordinary workman, doing away with the services of a skilled mechanic. We recommend slabbed tile when the services of a good tile setter can not be secured.

Grates—On pages 322 to 325 we show our different styles of coal and wood grates furnished with our mantels. Every grate is accurately fitted, finished, and constructed to burn economically and cleanly, requiring little care.

Unless order specifies grate wanted we send grate No. 2, size 24 x 30.

Fire Brick—These we do not furnish with grate No. 1, unless especially requested, and are not included in the prices given, as in most towns and cities they can be purchased for less than the freight would amount to.

Full and Complete Description for setting mantel, grate, and tile accompany each shipment.

Roach & Musser Sash & Door Co.

GRATES FOR WOOD MANTELS.

Burns Coal and Wood.

Combination Grate No. 1.
Appearance when set ready for use.

Combination Grate No. 1

consists of steel frame heavily copper plated with black hanging basket grate and ash screen, and is unexcelled for burning either wood or soft coal. Basket or fire pot is heavy cast iron, very rigid and strong. The steel frame has projecting canopy at top, giving to the whole a very pleasing appearance.

Summer Front

is used to close the fireplace during the warm weather and is a handsome piece of ornamental steel finished to match frame, and greatly adds to the appearance of the mantel. Our Combination Grate is made in two sizes:

24½ x 30¼ inches with 20-inch fire pot.
30½ x 30¼ inches with 24-inch fire pot.

Summer front, damper, and fire brick are not included in the prices given on mantels, and if same are wanted, order must so state, and our prices on same are as follows:

Summer front, for grate 24 x 30	\$1.70
Summer front, for grate 30 x 30	1.90
Damper, 21 inches x 7 inches	1.15
Damper, 27 inches x 7 inches	1.40
Fire brick, each	5¼c

Summer Front.
Used for closing the fireplace during the summer months.

Side and Rear View
Combination Grate No. 1.

The above illustrates Combination Grate in position, with anchor support resting on brick, the same passing under lugs which support basket. The latter hangs on the frame, also rests on the brick.

GRATES FOR WOOD MANTELS.

Burns Coal and Wood.

SET GRATE NO. 2.

Our double damper set grate No. 2 is unsurpassed in appearance, durability, and general utility; has heavy fire clay lining on back, and is all put together and shipped in one piece, ready for fastening in place, doing away with the services of a skilled mechanic.

It consists of steel frame, oxidized triple brass or copper plated, basket grate with dumping bottom, fire brick lining at back, two fuel dampers, ash screen, and summer piece to match. It is a strictly high-grade grate, inexpensive, serviceable, and attractive, and is made in two sizes, as follows:

21½ x 30¼ inches with 20-inch fire pot.
30½ x 30¼ inches with 24-inch fire pot.

Set Grate No. 2
as it appears when set.

Set Grate No. 2.

Summer Front furnished with Set Grate No. 2
without extra charge.

GRATES FOR WOOD MANTELS.

Burns Coal and Wood.

Set Grate No. 3
as it appears when set ready for use.

Summer Front Furnished with Set Grate No. 3
without extra charge.

SET GRATE NO. 3.

Our double damper Set Grate No. 3 for beauty, durability, and economy has no equal. It has heavy fire clay linings on side and back, and is made up and shipped all in one piece ready for immediate use.

It consists of steel frame, oxidized triple brass or copper plated, basket grate with shaking bottom, full fire brick lining, double draft flue dampers, sliding ash screen, and handsome summer piece to match, and while the cost for this grate is slightly in excess of our Nos. 1 and 2, yet it will save the difference in consumption of fuel during the first season's use. It is made in two sizes, as follows:

24 x 30 inches with 20-inch fire pot.
30 x 30 inches with 24-inch fire pot.

Side and Rear View.

Bottom View, Grate No. 3.

GRATES FOR WOOD MANTELS.

Burns Coal and Wood.

SET GRATE NO. 4.

This grate is absolutely the best, most serviceable and attractive complete fireplace ever made, and stands without an equal. We most highly recommend it to all desiring the best in grates that money can buy, and if not satisfactory in every way it can be returned at our expense. It is simple in its entire construction; is all in one piece, ready for fastening in place; has damper slide in ash screen, also in basket front; both can be closed completely to control fire and prevent dust when shaking or using. The rods connecting to dampers give complete control of the fire, also afford perfect ventilation at all times.

It consists of cast iron front, oxidized triple brass or copper plated basket grate with shaking bottom, full fire brick lining, double draft flue dampers, sliding ash screen, and handsome cast iron summer front, and is made in two sizes, as follows: 24 x 30 inches with 20-inch fire pot; 30 x 30 inches with 24-inch fire pot.

Set Grate No. 4
as it appears set in mantel ready for use.

Side and Rear View.

Bottom View Grate No. 4.

Summer Front Furnished with Set Grate No. 4
without extra charge.

LUMINOUS PRISM GLASS.

For Throwing Light in Dark Places.

Luminous Prism is a white, semi-transparent glass about as thick as ordinary plate, has both a smooth and lenticular outer or weather surface, and an inner surface of small accurately formed prisms.

The Object of PRISM GLASS is to deflect or bend the light from the sky (not sunlight) into dark offices, stores, work rooms, lofts, basements, etc., to produce, in fact, the same effect as though the sky was directly in front of the window openings instead of overhead.

For use on stores, offices, and college buildings where an ornamental appearance as well as light is desired **LUMINOUS PRISM** is made in plates 4 inches square, which are formed into panels and set in metal sash hinged or screwed to outside of window frame, while for windows of factories, mills, warehouses, etc., where light only is the object sought, it is made in sheets and glazed in top sash of regular windows the same as ordinary window glass.

It is well adapted for skylights, sidewalk lights, etc., is moderate in price and soon saves its cost in artificial lighting bills alone, aside from the great comfort and convenience it affords in having a perfect, natural lighted interior.

In asking for price or ordering give size and number of lights in window, depth, width, and height of room, width of street, alley or court from which the light comes, and approximate height of building or light obstruction opposite.

IMPORTANT NOTICE.

When moulding is priced by the inch *it is in all cases understood* that the price is based on ripping width of lumber, that is: $\frac{1}{4}$ of an inch wider than the finished size of moulding. For example: A $\frac{3}{4}$ -inch thick panel moulding if made to finish $1\frac{3}{4}$ inches wide would be charged as 2 inches (being ripping size); to finish full 2 inches, would be charged as $2\frac{1}{4}$ inches, etc.

Approximate weight of Mouldings, 1 x 1 inch, per 100 lineal feet, 15 pounds.

Roach & Musser Sash and Door Co.

Roach & Musser Sash and Door Co.
MAKERS OF EVERYTHING IN MILLWORK
MUSCATINE, IOWA.

INVITATION.

To Jobbers, Dealers, Architects, Builders, Contractors, and all interested in Millwork, we extend a cordial invitation to visit the City of Muscatine and thoroughly inspect our plant, one of the largest and most modern of Sash and Door Factories in the country.

Our make of Millwork having become so well and favorably known and quite frequently named in Architects' specifications, it is our desire that all interested in Millwork should become acquainted with our product, and in order that the **clear reasons** for the superiority of our make of Millwork may be seen, we extend to all this invitation.

Yours very truly,

Roach & Musser Sash & Door Co.

MUSCATINE, IOWA.
